30. How to configure Social Media login API?
31. How to manage Staff Roles?
32. How to manage Staff?
33. How to manage Addons?
34. How does Auto Matchmaker work?
35. How to enable messaging?
36. How to purchase a package by member?
37. How to deactivate a member account?
38. How to contact admin?
39. How can the admin reply to a member's queries?
40. How to use firebase push notification?

<u>How to in Details</u>

1. **What are the Server Requirements to activate the script?**

   Ans: To install the Script minimum server requirements are:

   - Php version 7.3/7.4
   - MySQL 5.6+
   - mod_rewrite Apache
   - BCMath PHP Extension
   - Ctype PHP Extension
   - JSON PHP Extension
   - Mbstring PHP Extension
   - OpenSSL PHP Extension
   - PDO PHP Extension
   - Tokenizer PHP Extension
   - XML PHP Extension
   - ZipArchive Extension

***In most servers, these extensions are enabled by default, but you should check with your hosting provider.*

2. **How to install the script?**

   Ans : To install the script follow the steps below.

   - Extract the downloaded .zip file from codecanyon on your PC.
   - **Upload** the Install.zip file to your server **public_html** or any other **directory** you intend to run the script.
   - **Extract** the zip file in that directory.
   - Create a new database from your server **MySQL database**.
   - Create a DB **user** to the database and link that **database** to the **DB user**.
   - First, hit your **site URL** and it will automatically take you to the **installation**.
   - Click on the **Start Installation Process**.
   - You will get the **Checking File Permission** page. If everything is ok then click on **Go to the next step**.

- Now you need to set **Database Host, Database Name, Database Username, Database Password,** and click **Continue**.
- Now you need to **import the SQL file**.
- Now **fill up the information on your website** and click **Continue**.
- Click on **Go to Home/ Login to the admin panel**.

3. How to activate the script?

Answer : Following the given procedure below will make the license activated for your domain and you'll be able to use the script smoothly:

- Open the link in the browser, https://activeitzone.com/check
- In the respective fields, put your Name, E-mail, **CodeCanyon Username, Purchase Key** and your intended **domain name** for the script and verify the captcha.
- The form will be submitted to check the purchase key and then activate the licence for that domain.
- You can change the activation later from this same form. Activating a Regular license again with another domain name will remove the activation of the previous domain.

4. How to download the latest version?

Answer: To download your item(s):

- Login to your **Codecanyon** account.
- Hover over your **username** from the top right corner and click **'Downloads'** from the drop-down menu.
- The downloads section displays a list of all the items purchased using your account.
- Click the **'Download'** button next to the item and select '**Main File(s)**' which contains all files, or '**Licence Certificate and Purchase Code**' for the item licence information only.

5. How to update to the latest Version?

Answer:

a. **Extract** the **downloaded file** from codecanyon.
b. There you will get a zipped folder named ‘**updates.zip**’. **Upload** that to the root directory on your server in which your previous version is running. **Unzip** that updates.zip file by selecting “**Extract here**”.
c. Now **reload** the home page and click on ‘**Update Now**’.
d. It’s **Done**!
e. The full system has been **updated** with a **single click**.
f. Let’s Browse Active eCommerce cms **Latest Version.**

6. Where will I find purchase code?

Answer:

1. **Log into** your Envato Market account.
2. Hover the mouse over your **username** at the top of the screen.
3. Click **‘Downloads’** from the drop-down menu.`
4. Click ‘**License certificate & purchase code**’ (available as PDF or text file).
